📄 PROFESSIONAL SUMMARY

I am a Senior Software Engineer with over 8 years of experience building scalable SaaS and ERP platforms. I specialize in the modern Angular ecosystem (v2-v21), NGRX, and Signal-based reactivity. I thrive on leading distributed frontend teams, collaborating deeply with backend engineers to shape APIs, and taking complex products from concept to production with clean, maintainable code.

- **Cross-Functional Alignment:** I partner directly with backend teams to design REST API contracts, ensuring we define exact response shapes and error structures that perfectly serve the UI.
- **Engineering Excellence:** I care deeply about codebase health. I run rigorous code reviews and champion standards that keep frontend architectures performant, stable, and easy to scale.

</> TECHNICAL SKILLS

Primary Stack: Angular (v2-21), TypeScript, RxJS, NGRX, Signals API, Standalone Components

Secondary Stack: React.js, Next.js, Redux

Languages: TypeScript (expert), JavaScript (ES6+), HTML5, SCSS/CSS3

Architecture: Nx Monorepo, Micro-Frontends, Atomic Design, Design Systems, PWA

API Integration: REST API design collaboration, contract definition, frontend-backend alignment

Tools & Platforms: Azure DevOps, Git, Figma, Jira | **AI Tools:** Antigravity, Claude Code, GitHub Copilot, Cursor

📁 PROFESSIONAL EXPERIENCE

Senior Software Engineer

JUN 2025 – MAR 2026

Yotech Limited | Sylhet, BD

- **Led the frontend architecture** for a large-scale SaaS ERP platform, using strict TypeScript and NGRX to keep the codebase stable and maintainable as it grew.
- **Successfully migrated legacy modules** to Angular 21, adopting Signals and standalone components without causing any production downtime.
- **Worked closely with backend teams** to design robust API contracts, making third-party integrations (like Xero and UberEats) much smoother and more predictable to implement.
- **Built flexible component libraries** to handle complex business logic natively in the UI, such as dynamic pricing tiers, payroll processing, and custom discount rules.

Frontend Engineer & Team Lead

Apr 2024 – May 2025

TygrLabs Limited | Dhaka, BD

- **Managed and mentored a distributed team** of 5 frontend developers. I guided our sprint planning, ran code reviews, and helped establish coding standards we all actually enjoyed using.
- **Boosted our team's delivery speed by 25%** by integrating AI-assisted development tools (Cursor, GitHub Copilot, Claude Code, Antigravity) into our daily engineering workflows.
- **Built a company-wide design system** from scratch using SCSS and Atomic Design principles, which was eventually adopted across all our active products.

- **Guided the migration of core applications** to Angular 17+, carefully protecting our performance metrics and security standards throughout the entire process.

Web Developer

Jan 2022 – Nov 2023

Wunderman Thompson Studios | Dhaka, BD

- **Developed highly modular frontend templates** for Dell Technologies' global marketing campaigns, which helped cut our standard production time by 40%.
- **Ensured high-visibility international platforms** looked pixel-perfect and strictly followed WCAG accessibility guidelines to provide a great experience for all users.
- **Integrated complex GSAP animations** and interactive features to build highly engaging, award-winning storytelling web platforms.
- **Collaborated actively in agile sprints**, coordinating with global design teams to translate Figma mockups into interactive web components with zero layout shifts.

Frontend Developer

Mar 2020 – Jan 2022

Yotech Limited | Sylhet, BD

- **Built a custom SCSS Theme Engine** for enterprise B2B SaaS clients, significantly reducing the time it took to white-label and customize UIs by 60%.
- **Created a dynamic, JSON-based rendering engine** that allowed the content team to update the frontend instantly without waiting for backend release cycles.
- **Delivered Progressive Web Apps (PWAs)** for core HR products, improving mobile accessibility and maintaining offline data reliability for field users.
- **Standardized the core frontend codebase** and established strict linting conventions, improving team code quality and reducing onboarding time for new developers.

Frontend Engineer

Mar 2018 – Nov 2019

B-cause Inc. Bangladesh Ltd | Dhaka, BD

- **Led the frontend redesign** for platforms targeting the Japanese market, tackling complex challenges with internationalization (i18n) and responsive typography.
- **Heavily optimized client-side rendering** and performance, which helped improve user retention on our highest-traffic applications.
- **Engineered a highly responsive HR Management Dashboard** utilizing modern JavaScript design patterns and CSS3 to replace legacy jQuery applications.
- **Translated high-fidelity PSD/XD design files** into lightweight, pixel-perfect, and cross-browser compatible user interfaces.

EDUCATION

B.Sc in Computer Science & Engineering

Leading University, Sylhet, Bangladesh

2014 – 2018

CERTIFICATIONS

- **CSS: Design Systems** – LinkedIn Learning
- **Responsive Web Design** – freeCodeCamp
